

WILL YOU BE
PREPARED?

LIVE FIRE TRAINING SIMULATOR

www.SAFETYSOLUTIONS.us

Are you Prepared?

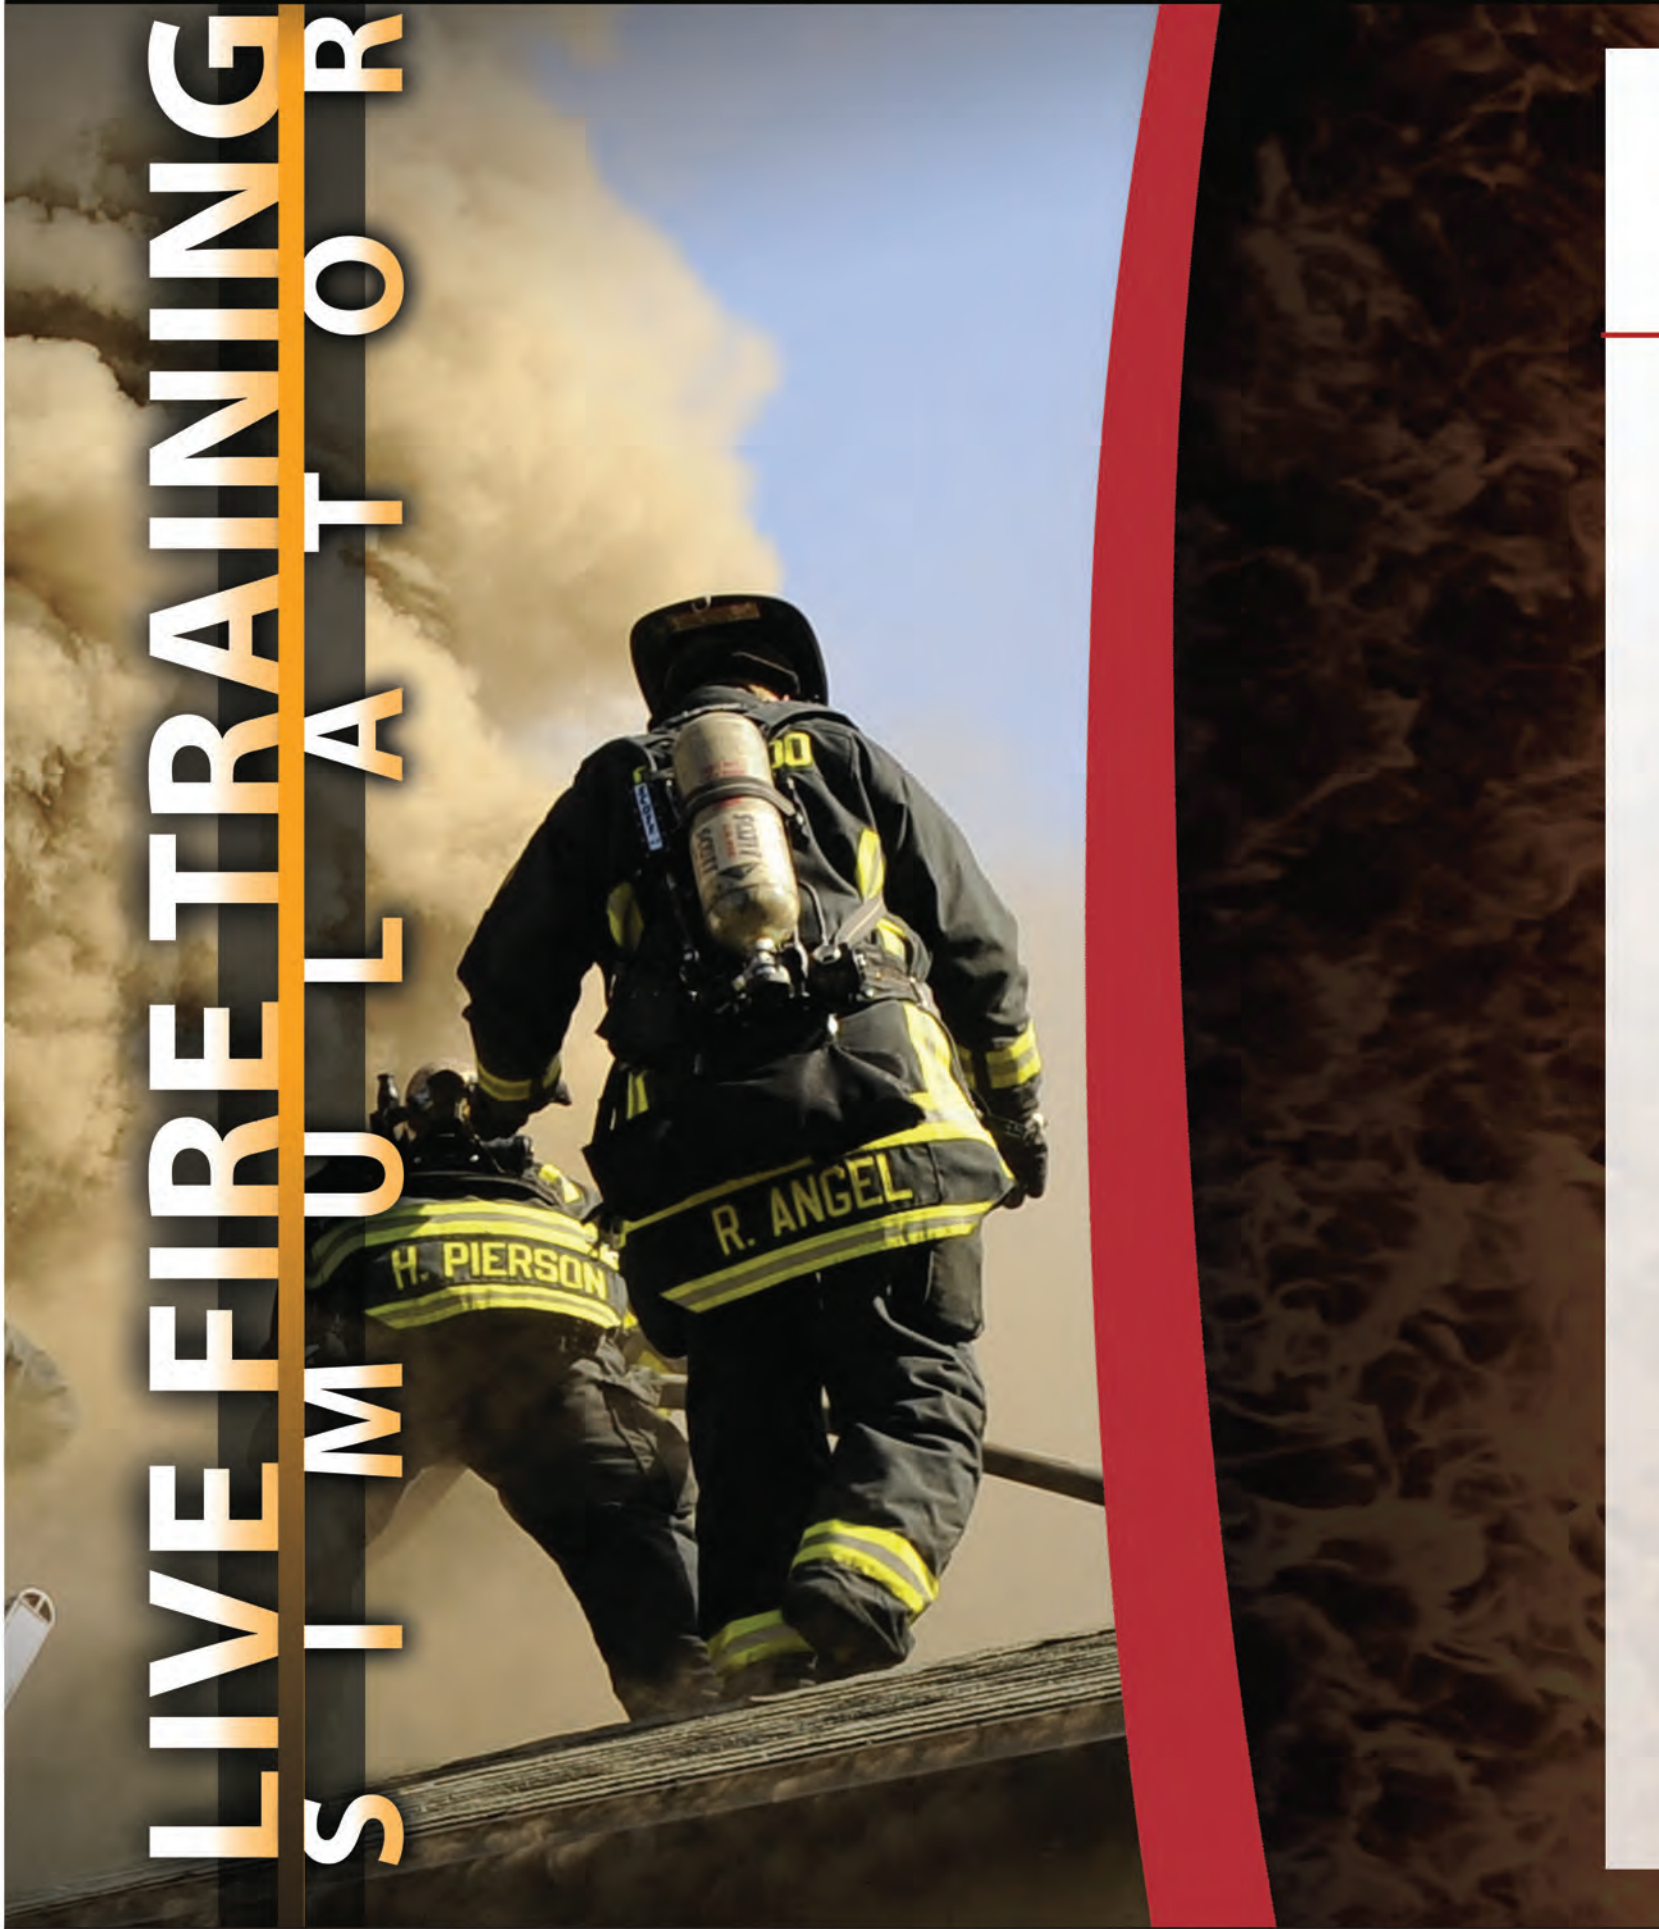

Benefits of the Mobile Live Fire Training Simulator:

- **Availability** – We will come to you and provide quality training at a cost that is affordable.
- **Quick Turnaround** – Our program will prepare you for extreme flashover situations without lengthy training. Flashover training, lecture and 1 burn can be completed in 4 hours if needed, to ensure minimum out-of-service time.
- **Easy and Quick Cleanup** – Because we are mobile, we are compact and self-contained and therefore allows for a fast cleanup.

Course Enabling Objectives:

- Experience realistic heat & fire conditions
- Sharpen your firefighting skills
- Learn how to conduct quick live saving fire size-ups
- Learn how to prevent a flashover from occurring
- Learn when to DIVE or DIE and how to survive a flashover
- Enhance your senses with innovative, realistic training
- Increase your comfort level in bunker gear
- Learn the importance of “venting for life”
- Vent-Enter-Search (VES) under extreme heat conditions
- Learn the necessary steps to conduct VES
- Sharpen your forcible entry skills
- Ventilate real windows - not make believe props
- Learn self extrication techniques
- Learn how to package a downed firefighter in seconds
- Firefighter packaging in realistic heat / fire conditions
- Learn new and improved MAYDAY procedures
- Learn how to survive in a low air situation
- Enhance your knowledge with innovative firefighter survival props

LIVE FIRE TRAINING SIMULATOR

EASY ACCESS TO ESSENTIAL TRAINING

SAFETY SOLUTIONS, INC. RECOGNIZES THE **MANY CHALLENGES** FIRE DEPARTMENTS FACE IN **SECURING TRAINING** FOR ITS PERSONNEL, AND IN RESPONSE, WE WANT TO PARTNER WITH YOU IN **OVERCOMING THOSE OBSTACLES.**

We make our Mobile Flashover training more accessible and tailored to your department's needs by going directly to your fire department. Our Mobile Flashover Unit can be situated in a local area, making access more effective and reducing the need to put entire companies out of service. The option of on-site department training can keep costs down as companies remain in service and can also eliminate travel costs associated with training at an off-site facility or training academy.

Custom Built UNITS

While our basic SSI Mobile Flashover Unit offers comprehensive and realistic training, we are proud to offer the option of a custom-designed unit to fit your individualized needs. With many additional options and features to choose from, the custom unit will be created to your specification and delivered right to your fire department for around half the price than that of other companies offering similar units.

Our Training Courses - A Must for All Firefighters

All new innovative Live Fire Survival classes. These intense single or three-day courses provide students with the solid foundation and skill set needed to work as a member of an engine or ladder company or a rapid intervention team on the fire-ground. SSI offers the ability to bring three essential firefighter survival classes to YOUR fire department.

Flashover Survival TRAINING

Flashover is the temperature in a compartment or room which results in the simultaneous ignition of all combustible contents in the space. This course will teach you to develop a working definition of a flashover, understand the 3 phases of flashover development, identify the 5 signs of an impending flashover, and identify factors which can influence the development of a flashover. Most importantly, firefighters will learn how to limit flashover development under realistic fire conditions along with understanding the limitations of modern day structural firefighting gear.

Live Fire Vent-Enter-Search (VES) TRAINING

An innovative new class offered ONLY by Safety Solutions Inc. Live Fire VES will teach you the difference between venting for life and venting for fire. Firefighters will learn where to initiate the VES process and when this life-saving technique can be utilized. Tactics will be discussed, reviewed, and then initiated under extreme heat conditions. The course will focus on ventilation and search techniques under realistic high-stress and high-heat conditions. VES will be conducted under Live Fire Flashover conditions.

Live Fire Firefighter RESCUE & SURVIVAL

Learn the necessary techniques to self rescue or rescue a fellow firefighter trapped inside a working fire. Learn individual techniques and skills involved in firefighter rescues. Training will include SCBA emergencies, mayday procedures, searching for a firefighter, assessing and packaging a firefighter, drags and carries, and entanglement rescues. Skills will be practiced under non-stress conditions and then mastered under live fire and high heat conditions.

Our training includes a combination of hands on activities, field work, lectures, case studies and group work. Courses are each 8 hours and all three bundled together, over a 3-day period, will be 24 hours of total training time.

CEUs are available for fire inspectors and fire instructors. Instructors that participate need to be a fire instructor with Live Fire Training Instructor and/or Live Fire Adjunct Training certification.

These innovative new firefighter survival courses offered ONLY by Safety Solutions Inc.

Availability

Call SSI to bring any or all three of our firefighter survival classes to your fire department.

Student REQUIREMENTS

Many of the tools needed for this training will be provided by Safety Solutions, however, all students are required to have the following:

- Bunker gear that meets applicable NFPA standards
- Self-contained breathing apparatus that meets applicable NFPA standards
- Mask that has been fit tested
- Water bottle and other refreshments
- Change of cloths
- Sunscreen
